PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of professional experience designing and delivering scalable, high-performance web applications. Specializes in React.js, TypeScript, and Next.js with a strong foundation in component architecture, state management, and RESTful API integration. Proven ability to translate UI/UX designs into responsive, pixel-accurate interfaces and optimize rendering performance on data-heavy applications. Collaborative team player experienced in Agile/Scrum environments with a consistent focus on code quality, reusability, and maintainable design systems.

SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3
Frameworks & Libraries: React.js, Next.js, Inertia.js, Vite, Tailwind CSS, Shadcn UI, Radix UI, Better Auth
State & Data: Zustand, TanStack (Query, Table, Router, Form), React Hook Form, Zod, Axios
Backend (Familiar): Node.js, Nest.js, Express.js, Laravel, REST API, Prisma, PostgreSQL, MySQL
Tools & Workflow: Git, GitHub, GitLab, Vercel, Agile/Scrum, Code Review, Figma, Postman, Docker
Integrations: PDDIKTI Neofeeder API, Payment Gateway (Maja, Doku, Midtrans), Pusher, Vercel AI SDK

WORK EXPERIENCE

Frontend Developer February 2023 – Present
PT. Solusi Cerdas Berkualitas Banda Aceh, Indonesia

- Delivered 4+ enterprise web applications using React.js, TypeScript, and Tailwind CSS, translating UI/UX designs into pixel-accurate, responsive interfaces.
- Built a reusable component library of 50+ components and a standardized styling system, ensuring UI consistency across 4+ internal products.
- Integrated 100+ RESTful API endpoints with the backend team, covering authentication flows, data validation, and structured error handling.
- Managed application state using Zustand and Context API, optimizing data flow for complex multi-module applications.
- Improved performance through code splitting, lazy loading, and memoization, reducing initial load time by up to 35% on data-heavy pages.
- Contributed to internal component documentation and coding standards, reducing onboarding time for new developers; participated in Agile/Scrum ceremonies across 2-week sprint cycles.

Notable Projects:

University Academic Information System Team Project
Stack: Next.js, TypeScript, Zustand, TanStack (Query, Table, Form), Zod, Axios, Tailwind CSS, Shadcn UI

- Built core academic modules (course registration, grading, scheduling) integrated with PDDIKTI via Neofeeder API, serving 1,000+ active users.
- Implemented role-based access control (RBAC) for 3 user types: admin, lecturer, and student.
- Optimized table rendering on datasets exceeding 1,000 rows, reducing render time by ~40% through virtualization and pagination.

Financial Information System Team Project
Stack: React.js, TypeScript, Vite, Zustand, React Hook Form, Zod, Tailwind CSS, Shadcn UI

- Developed transaction, reporting, and dashboard modules with multi-gateway payment integration (Maja, Doku), processing high-volume financial data.
- Applied strict schema validation with Zod, achieving 100% input accuracy across financial forms.

- Extracted 20+ reusable components across modules, reducing code duplication by ~30%.

Asset Management System

Team Project

Stack: React.js, TypeScript, Vite, Zustand, React Hook Form, Zod, Tailwind CSS, Shadcn UI

- Implemented asset registration, transfer, and maintenance modules with real-time tracking across 5,000+ asset records.
- Added dynamic search and filtering with Excel and PDF export, reducing manual reporting time for operations staff.
- Applied lazy loading and code splitting, improving initial page load speed by ~25%.

Corporate Landing Page

Solo Project

Stack: Next.js, TypeScript, Tailwind CSS

- Delivered full development cycle from UI/UX implementation to production deployment on Company's infrastructure.
- Integrated contact form with email notification service and implemented scroll-based animations.
- Achieved Lighthouse performance score of 98/100 through image optimization, lazy loading, and asset minification.

PERSONAL PROJECTS

Reseply — AI-Powered Recipe Sharing Platform | GitHub

Solo Project

Stack: Next.js, TypeScript, Tailwind CSS, Shadcn UI, Better Auth, Vercel AI SDK, TanStack (Query, Form), Prisma, PostgreSQL

A full-stack Indonesian recipe sharing platform featuring a Virtual Chef AI assistant (Vercel AI SDK + OpenRouter) for personalized cooking recommendations, advanced search and filtering by category, ingredient, and difficulty level, a favorites system, and dark/light mode. Built with Better Auth, Prisma, and PostgreSQL with fully responsive design.

Indekos — Boarding House Finder & Booking System | GitHub

Solo Project

Stack: Laravel, React, Inertia.js, Tailwind CSS, MySQL, Midtrans

A full-stack boarding house discovery and booking platform. Enables tenants to search and filter available rooms with Midtrans payment gateway integration. Features a landlord dashboard for property management and a tenant portal for reservation tracking.

Inventaris App — Inventory Management System | GitHub

Solo Project

Stack: Laravel, React, Inertia.js, TypeScript, Tailwind CSS, Shadcn UI, Pusher, MySQL

A full-stack inventory management application with real-time updates via Pusher. Includes modules for item management, user administration, and category organization, built with Laravel Inertia.js and React TypeScript for a type-safe, SPA-like experience.

EDUCATION

Politeknik Aceh

2019 – 2022

Associate Degree in Information Technology

GPA: 3.64 / 4.00

Final Project: SIGAM — Developed a web-based village administration information system using Laravel, MySQL, Blade, and Bootstrap to digitize population data management for Jantho Makmur village.

CERTIFICATION & BOOTCAMP

- React Foundations for Next.js — Vercel, 2025
- Next.js App Router Fundamentals — Vercel, 2025
- MERN Stack — Udemy, 2023
- Laravel: Newbie To Pro — Udemy, 2023

LANGUAGES

Indonesian — Native

English — Pre-Intermediate
